

## WILL IT TAKE ALIEN INTERFERENCE TO STOP A NUCLEAR ATTACK?

Throughout history we have had thousands of clues documented around the world about Alien life on earth from throughout the Galaxy. It is now estimated by governments around the world that earth has been visited by around 80 species of Aliens from millions of light years away. It is not new and has been going on for centuries. The consensus is that all but a handful of these species are in favor of preserving earth and helping our planet survive and prosper. The fairly recent (1980)

landing in the Rendlesham Forest in England (The English “Roswell”) where an Alien species spent three days in the forest and eventually took over and launched several ICBM missiles at an adjacent military base provides fodder that addresses our thesis, Can Aliens take control of our weapons?

Despite overwhelming evidence of active Alien life on earth, many Americans continue to remain in the dark about what is really going on.

I consider my state of being as a gift, a gift of independence where I do not have to work, nor do I need to impress anyone or worry about what anyone thinks. I can speak freely without undue influence and I can use my own resources to get information not typically available to most Americans. For reasons unknown to me as to why I was so lucky, I have met four U.S. Presidents and had a conversation with President Reagan about Alien activity. It is why I do the work I do. I also do the vast majority of it at no cost to my readers. Therefore I do not have to conform to sponsors, shareholders or answer to a boss. My shareholders are my readers. Unfortunately too many things cost too much today, which is why so many Americans are so busy paddling harder and harder just to stay ahead of inflation. So take a break and take this opportunity to imagine how small earth really is compared to life outside our galaxy, and why our problems are really just pebbles in the sand for most compared to what is going on right under your nose, every day.

Our own government continues to deny the existence of Alien Life, even with active UFO’s (now renamed UAP’s to add confusion) flying right in front of us and despite our top Air Force pilots filming their existence in the skies above our coastlines. Inside reporting and first hand testimony on these events has been sidelined, along with the recent Q3-2023 Congressional Hearings on UFO’s/UAP’s that came and then disappeared like they have always done over the past decades.

So much for those brave Congressional representatives with their hearts hell bent on getting to the bottom of the UFO issue. If only they knew why their efforts would be squashed. Our military and others across the globe continue to see UFO activity in the skies and diving into our oceans on almost a weekly basis. We even have reports from past U.S. Presidents, even a series

of meetings directly with President Eisenhower meeting with the “Grey’s and the Nordics” about Alien concerns over man’s potential use of nuclear weapons, now reported as just “here say”. We can at least give the current Congress credit for re-opening their investigation on what really happened at Roswell in 1947. Or they can just read our book and save the millions on their own investigation that will not be allowed to conclude anything about Alien existence on earth. Another pending big win for the Industrial Military Complex.

This is why we spent over 20 years studying Alien activity and covered dozens of topics and proof of Alien life on earth. We finally put it all into a book, “Extraterrestrial Existence” “What Do We Really Know”. We covered what is going on today with Aliens. We talked about former and current Alien activity with the U.S. government. We even discussed where it is going on, who knows about it, and why many U.S. Presidents are uninformed about the truth.

President Eisenhower warned us about the “Industrial Military Complex”. He saw it coming. It was likely why President Kennedy was killed. Yes, it was likely the CIA, but why did they kill a sitting U.S. President?. Did it have anything to do with Alien technology and Russia? We provide what we believe to be the answers. President Trump, if re-elected, has vowed to release the classified files on President Kennedy. It is expected it will be highly redacted but Trump may be on to something. He might also be the exact President the Industrial Military does not want to see in office.

This is why on this July 4<sup>th</sup> holiday week, as Americans celebrate “Independence Day”, we thought we would pull some extracts from our recent book “Extraterrestrial Existence” “What Do We Really Know” to raise awareness about our nation, what is at stake, and why Alien activity is so high right now. They are doing more than just watching us, they are monitoring military activity around the world. They are watching our wars. The Ukrainian Army recently got a firsthand look at an Alien SpaceShip reminding them they are aware of the Russian War. They are also aware of the danger of this war going nuclear.

They are also considering what to do if a nuclear bomb is used. With five countries stalking international waters with nuclear submarines loaded with the latest in nuclear warheads (except for Russia whose nuclear technology may be aging beyond repair) in the Red Sea, the Baltic Sea, the China Strait, and crisscrossing our oceans, the nuclear threat has not been this high in decades-and neither has Alien activity watching us watch our enemies. While Alien activity likely started in 1904 with U.S. Presidents and Theordore Roosevelt, we will pick up the action with the “alleged” meeting between President Eisenhower at Edwards Air Force base in Feb of 1954.

**The Alleged Eisenhower Alien Meeting-Feb 20<sup>th</sup>, 1954.-** We spent more time on the Eisenhower Administration because of the sheer nature of the subject matter. Either President Eisenhower met with Aliens or he did not. If true this would be the greatest cover up of all time so we dug as far as we could go and here is what we found on this subject, what really happened at Roswell, and the Rendlesham Air Force bases, the British “Roswell case” . It now looks increasingly likely that the Roswell UFO crash was covered up, at least to the point of not being a weather balloon. There are simply too many people, affidavits, and “threats” that are now on the record in the Pro Alien camp from over fifty people “who saw it.” Why would all fifty

people who did not know each other outside their command group or family, all be lying? For what purpose?

The alleged cover up story makes more sense than the weather balloon story because if it were a weather balloon the government would have never had to “recant” their first reporting they captured a UFO. They did not capture anything, they responded to a reported UFO crash. Only the government could take credit for capturing a broken UFO. We are dealing with plain common sense here. If the Roswell crash was really a UFO from another civilization, then the President Eisenhower meeting with Aliens has real legs. Once pre-confirms the other and based on accounts of over one hundred people as first-hand witnesses to these two events, it does beg the question why many high-ranking government officials and other people involved in the transport of Alien Bodies and the Spacecrafts later had to recant their stories. By “had” we mean it did not happen or you will not be here on earth any longer, at least anywhere you would wish to live. If one can create enough evidence for either one of these events, it is a much shorter hop to believe either or both events occurred.

It is well established in historical records that former US President Dwight Eisenhower may be the only former President (by some reports) to have met directly with Aliens. How is this possible and how is it that this has not been all over the media? Well, let us break it down. The so called “military balloon” incident as it was later called occurred on July 7<sup>th</sup>, 1947 produced a whole new crop of people involved in what appears to be a recreation of the first real UFO crash. The photos of the creation of the “weather balloon” not only look fake, but they do not represent what a weather balloon would look like if it crashed in the desert. They look like what they are, an off the shelf weather balloon broke into pieces. Now the government just about doubled the amount of people first involved in the real crash as the cover up begs the question why the need to recreate a crashed weather balloon?

This real crash was known as the UFO crash in Roswell, New Mexico. Our book documents the names and roles of the first people to get to the Roswell crash site and what they saw. All of the people involved in the first crash were not needed in the remake crash of a weather balloon because one cannot attend two crashes in the same place and have the same story. Therefore the real first responders are not featured in the remake for the most part. We report on who were the first responders, and the military who were charged with moving the spacecraft and the Alien bodies. The pressure put on them to recant their stories, cancel ever talking about it, and deny the event in its entirety changed many of their lives and their kids lives for two generations. It is an interesting read and now 75 plus years later, the current Congress is trying to figure it out.

Many of our Presidents have had first encounters with Aliens. We detail them in our book. President Eisenhower served from 1953 to 1961 so he was the sitting U.S. President at the time just a few years after the Roswell incident occurred. So, a meeting eight years after the crash at least fits the timing of when UFOs were front and center in the public’s mind and created the largest ever “skunk works program” by a wide margin-project blue book which sowed the seeds for the atomic bomb. If you were an Alien concerned about this program, there was little need to meet with anyone else in the United States other than the Commander in Chief, especially a US President that led the Allied Forces in World War II.

It was Feb 20<sup>th</sup> in 1954 and the President “Ike” was staying at the Smoking Tree Ranch on a golfing vacation in Palm Springs, California. This property is gated and is spread out on over 375 acres. It was widely reported he had “an emergency” after allegedly chipping his tooth on a chicken wing at dinner. His real Dentist did later reveal he had problems with the Crown on that particular tooth but he was not in California that night, and “Ike” was over 3,000 miles from the White House or his Dentist. It was later rumored the President was seen leaving the ranch after dinner around 8 to 9 PM and by accounts from his inside team was headed to Edwards Air Force Base.

Given the Smoking Tree Ranch location in Palm Springs the drive would have taken about two hours and thirty-five minutes according to Google, just in time for a midnight meeting. It is certainly possible he was driven given there are no discernable records of him flying there that we could locate. Marine One was not an option in 1954 so he would have had to fly on Air Force One. In fact, President Eisenhower was the first person to fly as a President from the white house lawn but it was not on Marine One. Today’s Marine One has four Presidential Helicopters and a staff of eight hundred people to maintain it. Not the case in 1954. We also could not confirm any Presidential Flight on Air Force One that night with the President. Conceivably he could have traveled in a private plane under a silent identity. We had some leads on this matter but they were not enough for us to print.

Edwards is the home of the Air Force Test Center, Air Force Test Pilot School, and NASA's Armstrong Flight Research Center. It is the Air Force Materiel Command center for conducting and supporting research and development of flight, as well as testing and evaluating aerospace systems from concept to combat. ([www.wikipedia.org](http://www.wikipedia.org). 2023).

When “Ike” was alleged to have arrived, he would have had to go through three checkpoints to get to the meeting. The first was into the Air Force Base itself, the second was into a remote area within the base, and the third was into a highly secure building, located within a highly guarded military base. He was with a small security detail from the reports we have been able to ascertain. The final building was well past the main buildings and the President had to be greeted and cleared to gain access into the last building. We cannot find the names of these people but there were a dozen people at, near, or in the third building when this alleged meeting occurred. Records of a formal entry of the President do not exist, something you might expect if one were meeting with actual Aliens.

That means some people other than the President’s security detail knew of this story. While we could not confirm who he was traveling with at that hour or if Security detail was let into the third building, leaks that have occurred since 1954 could have come from at least a dozen first-hand accounts. It has been leaked that he met with “two aliens” nicknamed “Nordics” because of their human-like resemblance to Scandinavian humans. Someone in this chain of

people on the inside are all suspects in confirming this story, which oddly is now the subject of another investigation, more than 75 years later.

The Alien concerns were that we, the United States, would end up in a nuclear war and the “Nordics” pointed out that a nuclear fallout would have negative effects for the atmosphere and create problems for interplanetary space travel. A nuclear fallout could wipe out instruments thereby making traveling into and out of our atmosphere either extremely dangerous or not possible. According to the story, the two representative Aliens offered to share flying saucer technology with us in exchange for giving up our nuclear weapons.

They confirmed they had traveled to earth from another solar system in a flying saucer. This *agenda* makes sense if nothing else. This reason for Alien concerns also checks another box. It makes sense and after an alleged crash years earlier in Roswell, which Eisenhower knew was real, a meeting between an Alien Civilization and the US to express concerns about a nuclear war that could hamper Alien interest is viable on the face of it. It is not conclusive proof by any means but part of believing in anything is the ability to “suspend” belief and for a moment think about the logic of it.

The Ike-met-with-ETs theory is advanced by Michael Salla, a former American University professor who now runs the Peace Ambassador Program at AU's Center for Global Peace. (Carlson, 2004).

After church in Los Angeles the next day, the White House issued a Press Release confirming the Dental visit which is also the official storyline used at the Eisenhower Library in Abilene, Kansas. However, many people who investigated this story from the inside do not believe the dental version of what happened that night.

“Michael Salla, who has a PhD in government from the University of Queensland in his native Australia, does not believe it. He figures the dentist trip is just a cover story. He believes Ike went to Edwards Air Force Base, where he met with two ETs with white hair, pale blue eyes, and colorless lips.” (Carlson, 2004).

What is odd about the “Dental Version” of the story is why would the President of the United States need to travel 131 miles, whether by air or automobile to see a Dentist, even in Palm Springs. In the alternate event, where was the story about a local dental visit. Since Edwards Air Force base was established in the 1930's (first called Muroc Field), this confirms that the distance was achievable by auto at the time. It seems the President could have seen a number of Dentists in the Palm Springs area within 30 minutes of his tooth injury as the President of the US. He also belonged to Eldorado Golf Club at that time. Since there is no record of him ever seeing any local Dentist, is it possible he went to Edwards Air Force Base to see a Dentist?

Certainly, someone at the Smoking Tree CC was a Dentist or knew someone who was. Furthermore, based on military records, why would a “Dentist Office” be located in a remote area of Edwards Air Force Base that had its own security beyond what was on the base itself. He either went to the Air Force Base or he did not. If he had seen a local Dentist it is more logical to assume the story would have been in the news, with a comment from the dentist gladly

reporting he did see the President and letting the world know he is healing nicely. We could not find a single report about any Dentist visit that night by the President. That leaves three possibilities.

- 1) He went to see a Dentist 131 miles away inside a highly remote and very highly secured building which makes no sense on any level given better options.
- 2) He saw a local Dentist which would have been in the news. Not a single report on this.
- 3) There was never a Dentist visit and he disappeared around 8-9 PM, never to be seen again that night by his friends or family. He attended an unscheduled and urgent meeting, somehow at midnight on a Saturday night at an air force base 131 miles away. Yes, Feb 20<sup>th</sup>, 1954 was a Saturday.

Now forgetting about an actual Alien meeting, which one of these three stories seems more plausible. The Dentist visit does not involve national security so there would have been no harm in just reporting on where he went, was his tooth repaired, and how was he feeling. He also did not have a single person confirm they were with him during this dental period, or drove him or picked him up. His disappearance is most explained by Number Three, albeit does not confirm an actual Alien meeting occurred. This of course raises all kinds of questions on where he went, but as the Commander in Chief the President would certainly be notified if there was an urgent need to meet with Aliens or the meeting was intentionally set up to play past midnight on a Saturday night when eyes on the President would have been at a minimum.

"Thanks to Eisenhower's long military service and time as president, his dental records are thorough and document many troubles with that particular crown. Still, the theory lives on with believers because the dentist who treated Eisenhower passed away without leaving record of the visit." (riccidmd.com, 2023).

Well unless Eisenhower traveled with his Dentist in Washington DC, using his own Dentist was not a possibility since he was in Palm Springs, CA.

So, the real Dentist to Eisenhower passed away and did not leave any records. Can there be a statement that could suggest a cover up more than the wording of this one? How convenient.

According to Barack Obama, the White House maintained a dental office (ever since the Hoover Administration) in the basement of the white house where the dentist "comes to the President." Obama confirmed this on the Jimmy Kimmel show after he left office. He also admitted he could neither "confirm or deny" the existence of Alien Life. You decide. There were many other ways he could have declined the existence of Alien Life that he could have used that slammed the door shut on the matter. Back to the Eisenhower story.

Given that President Eisenhower was in Palm Springs the night of his Alien visit, seeing his regular Dentist would have not been practical in the White House, but follow up records on the crown would have been. No Dentist would have failed to note his "repair" when his next visit occurred.

No notes were ever recorded by his regular Dentist. While the case for an Alien meeting does not necessarily revolve around "Ike's" dental records, the lack of any credible evidence of repairing the chipped tooth story only adds to an Alien meeting (or some other emergency occurrence) on the night of Feb 20<sup>th</sup>, 1954. What is clear is that Eisenhower was not at the country club from 9 PM until early on Sunday morning, well beyond the length of time needed for a crown repair.

This is not the only meeting alleged between Aliens and President Eisenhower as reported by some close insiders years after the events occurred. Later in 1954, it has been speculated that President Eisenhower met with the "Greys" and granted permission for them to capture Americans for "testing" provided they were returned unharmed. Not sure how much leverage any President would have under this type of discussion, but many people close to the President's inner circle at the time believe this meeting occurred.

While estimates vary, reports indicate that thousands of people have since been captured and "tagged" by Aliens on all continents. There are now hundreds of stories about humans that were captured and later had a small microchip removed from their bodies. There are many excellent books on ET theories and Alien Agendas.

As reported by Peter Carlson (below) in 2004, Salla, author of "The Hero's Journey Toward a Second American Century," later published his ET theories in his new book, "Ecopolitics: Political Implications of the Extraterrestrial Presence" and in an article on his "Ecopolitics" Web site ([www.exopolitics.org](http://www.exopolitics.org)).

According to accounts after a classified government program was ended in 1969 to track Alien Activity back during the Eisenhower Administration we note the comment from the press below.

"Likewise, many alien encounters are listed in the U.S. government program "Project Blue Book" tasked to inspect UFOs from 1948 to 1969. Yet, the project was concluded as no aliens were uncovered and they were determined to not pose a threat to U.S. national security." (Keskin, 2022).

This is one of the most interesting comments made about Aliens we found. So, every single one of the 12,618 cases contained in Project Blue Book were deemed conclusively false, with only 3% not explainable. If just one were true and real it makes no difference whether the others were true. If true, this also has to be another one of the greatest possible white house cover-ups in history. For starters if "no aliens" were uncovered, how is it possible to determine they are not a threat?"

Only our Government could put out such a misdirect. Moreover, a pattern seems to emerge if one looks at the existence of evidence for extraterrestrial life in between the so called "Dark Ops or "Skunkworks programs" that seem to change over time from President to President. What is the reason for this change? Is it to bury prior evidence and create a new honeypot or does it give sitting US Presidents more buy in with the IMC?

**The Eisenhower “Alien Meeting” Conclusion** We find it interesting that the Roswell incident was followed by decades of books, accounts, and documentaries about what did or did not happen after the crash occurred. By any standard, it is understandable why any White House Administration would deny “a meeting with Aliens” occurred, but in the Eisenhower Alien Meeting there was no “crash site” which at least added evidence as in the Roswell Case because it was clear that some type of crash occurred. In the alleged Eisenhower “meeting with Aliens” there were no farmers on the scene nor any first responders to take away evidence. In the Eisenhower encounter, the circle of people involved may well have been less than ten people who initially knew or otherwise became aware that Eisenhower may have visited Edwards Air Force Base that night. Even fewer people may have had access inside the building that hosted the Aliens. This makes it significantly harder to piece together any credible evidence a meeting occurred or any credible testimony on why the trip may have been made.

What we do have is the possibility a meeting may have occurred because the “Government Version” of what happened that night does not check out. There was no record of a Dental visit of any kind. If it were a governmental cover up, why the need for a Dentist visit that by all accounts did not exist that night. Why not just a stomach ache. There were some accounts that Eisenhower was whisked away to Edwards Air Force Base for a meeting that would have taken place around midnight. While we cannot conclude he met with Alien Life, the mere fact he may well have went to the air force base for a midnight meeting does beg the question, what was so important on a Saturday night while having dinner at his country club, that the President of the United States suddenly had to spend two and half hours each way by car, to take a meeting. Combined with a lack of any credible evidence of a tooth repair, it does provide a path to believing a meeting could have taken place. In a contrarian viewpoint, the Alien Meeting story is credible because the Dentist visit story is not.

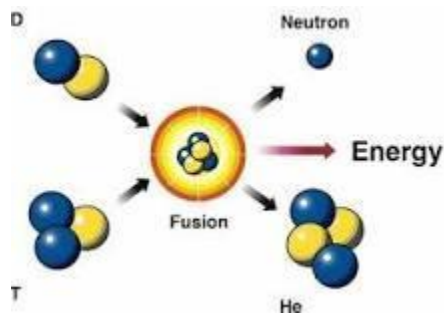

Throughout history we have reportedly exchanged technology for “non-nuclear activity” agreements with the Nordics and Greys. Taking a deep dive into President Eisenhower, Teddy Roosevelt, and later onto Henry Truman and Eisenhower, our military got tipped off about how to build the atom bomb as a weapon. Each of these men believed that advancing military technology was the key to a safer world. We later got information on how to build a microchip, why Kevlar is great for battle protection, and now we are going back to “Nicola Tesla” who was more than 100 years ahead of his time in pulling our magnetic energy out of the earth. How to harness boundless energies was another Alien tip used to repower their spaceships in several underground pyramids around the world. See our report on the Dark Pyramid in Alaska contained in our book.

Our planet and moon has been an alternative energy source and fill up location for Alien craft for thousands of years. Neil Armstrong and Buzz Aldrin reported this activity on the Moon over fifty years ago. New evidence suggests they came prepared and left a “gift” for the Aliens to receive on their space mission to land on the moon. The Alien misdirect has been going on ever since.

We address the power of fission energy in the book, something that Elon Musk and the other large Space Companies are working on ironically to preserve our planet. The challenges of Nuclear Fission are just in the very early stage of actual commercial testing but after a 100 year delay, we are now making progress thanks to the super computer and artificial intelligence beginning to fill in the knowledge gaps. For more detail see our website for whitepapers and books on these subjects.

How does fusion vs fission perform under creation of each? We discuss Nuclear fission and fusion in more detail in our whitepapers.

“Fission is the splitting of a heavy, unstable nucleus into two lighter nuclei, and fusion is the process where two light nuclei combine together releasing vast amounts of energy. While different, the two processes have a significant role in the past, present, and future of energy creation.”  
([www.nuclear.duke-energy.com](http://www.nuclear.duke-energy.com). May 27<sup>th</sup>, 2021

---

We now take you up to 1980, when one of the most astounding events between man and Alien Life occurred, right under our watch. I take you to when “Lord Hill Norton” first learned that a number of ICBM nuclear missiles had been fired into space, with seemingly not a single person knowing how it happened, who was in control, or where these missiles ended up.

The story has two interesting elements. The first is that the actual spaceship landed in the forest about a twenty minute walk from the military base. Four service men went on to check out the spacecraft. According to their accounts they came across a large cylinder spacecraft with all kinds of lights. While three of the men held back in the forest, one of them decided to proceed all the way to the spaceship. What happened next is one of the greatest examples of technology ever not known to man. One of the service men put his hand on the spacecraft and within minutes felt a strange pulse running into his body.

Later that night he pulled out a notebook and began writing in binary code for twelve pages. He had no idea what the code meant and given the “official policy” on the matter, he kept the news to himself, for over fifteen years. He was also invited to a reunion fifteen years later and decided to attend, with his notebook.

After discussing the matter he turned in the notebook to our government where it was sent to two different encryption labs for decoding. Both labs came back with the same story. What the notebook revealed was startling. We disclose the results of the decoding along with the key individual and facts in our book. The results tell an interesting story about Aliens on earth.

We now proceed with what happened with the missiles. For one thing, the servicemen who discovered the Spacecraft location did not create “burn marks” in the diameter of the

spacecraft. The ground was parched in deep burn marks when the saucer took off. Nothing fake about it.

Lord Hill Norton, after reviewing the case file on Rendlesham forest, did not feel something was right. For one thing, how could “animals in the forest” create burn marks in the ground from an alleged takeoff. It just did not add up. Second, all 16 men that were there the night the missiles were launched into space told the same story. Never mind they should not have been on sight according to the UK, who leased the site to the United States as a strategic military site. Let’s pick up from an internal memo sent to the then Minister of Defense, Lord Gilbert, who had downplayed the incident in his report.

We note the setting from this incident by Rojas.

“In late December of 1980, several US servicemen witnessed UFO activity over a two day period near the bases of RAF Bentwaters and RAF Woodbridge, both on lease by the US from the UK. The Rendlesham forest surrounds the bases. One of the witnesses included Deputy Base Commander, [Charles Halt](#), who was ordered to forward a memo on the incident to the MOD. In a response dated October 22, 1997 to Minister of State for Defense, Lord Gilbert, who claimed the Rendlesham sightings were not of interest, Lord Hill-Norton wrote:” (Rojas, 2011).

We note Lord Norton Hill and his frustration with getting real information.

***“My position both privately and publicly expressed over the last dozen years or more, is that there are only two possibilities, either:***

***a. An intrusion into our Air Space and a landing by unidentified craft took place at Rendlesham, as described.***

***b. The Deputy Commander of an operational, nuclear armed, US Air Force Base in England, and a large number of his enlisted men, were either hallucinating or lying.***

***Either of these simply must be 'of interest to the Ministry of Defense', which has been repeatedly denied, in precisely those terms. They, or words very like them, are used again in your letter and I believe, in the light of the above, you would not feel inclined to sign your name to them again.”***

This incident resulted in over 16 servicemen during the period of time between Dec 25<sup>th</sup> and Dec 30<sup>th</sup> in 1980 watching an Alien craft take control of the missiles with nuclear warheads attached and fire them deep into space according to eyewitnesses. Lord Gilbert ended up stating upon being pressed by Lord Hill Norton that he could not confirm or deny any such incident occurred. We note these facts from a first-hand account from US Air Force Captain Robert Salas and provide all of the details in the book.

We now take a look at why knowledge from another world about space travel is so essential right now.

We present a brief section from the whitepaper from “Critical Space Race Theory” [www.botdorfresearch.com](http://www.botdorfresearch.com) on why we need to understand Alien Space travel technologies and accelerate our development of nuclear fission and Helium extraction from the Moon.

The raw materials on the moon are worth more than ever single company in the world combined. Can you say \$2.5 Quintillion? Hence the rush to mine other planets and our Moon. The estimate to travel with humans to Mars was that it would take over 5 years just to get there and another five years to get back just thirty years ago.

Today, NASA is planning to get there in 45 days using nuclear fission as the power source. Landing on Mars with a human is about seven years to ten years away. Elon Musk is behind this time frame and he is the one of a few companies working on inventing the technology to make space mining on Mars a reality.

We are talking today about traveling beyond Mars to the nearest Exo-planets to understand life forms within our own Galaxy, about 4.5 light years away to an exo-planet like Proxima Centauri B, an earth-like planet that may support some types of life forms. Initial efforts however will involve a faraway space station, where robot ships can deck, park, and get refueled. The big space concerns (Space-X, Galactic, Blue Origin and NASA are already designing space travel for mining the moon and beyond to replace the rare earth minerals that will be depleted in the next 75 years.

### **CONCLUSIONS ABOUT THE USE OF NUCLEAR WEAPONS IN 2024 OR 2025:**

We certainly hope that over the coming weeks and months, that calmer heads will prevail around the world so that the nuclear threats now in place can be tempered. The pending July Summer Olympics in Paris may be just the ointment needed to calm international pressures to continue the wars, expand them, or start new ones, if only for a few weeks. What we do know is today's nuclear threats are real, and many countries including the U.S. are on the highest level of nuclear monitoring and maintaining an “at the ready stance” as we have ever seen. A wrong move or false interpretation could see a nuclear attack started.

The real question about Alien life on earth has to start with some type of hard evidence. Over the centuries there are literally thousands of clues. We point out several of them in our book not discussed today in this article. As of July 2024, even researchers from Harvard University now claim there are Aliens living among us. While it has not yet been peer reviewed, at what point are Americans going to really understand the Alien misdirect. The most recent PEW study states that 77% of all Americans believe in Aliens so why is the government still holding back on us?

We have credible firsthand accounts from Astronauts who filmed Alien activity on the Moon, leaks from highly classified military personnel that have confirmed joint Alien/US military programs, actual video of flying saucers flying well beyond any earthly capability from our top pilots, and admissions from our Presidents, either in private or in speeches, letting us know that Alien technology and secrets have been part of the American landscape for over the past One Hundred years.

We have presented just a small snapshot here of why Alien activity exists on earth, and have many other projects, accounts, and pending Alien Activity underway as reported in our book. As to our government or any other government coming forward soon, we are not sure that will happen anytime soon. In fact, if a UFO landed on the white house lawn and greeted a sitting U.S. President, it would likely be dismissed as an artificial Intelligence fake. The last great Politician to come forward about real Alien life on earth was the late great Paul Hellyer, the former Minister of Defense from Canada, who recorded a YouTube video years ago operating as the only member of a G8 Nation senior cabinet member who indeed declared that Alien Life is alive and well on earth, and went so far as to say, it has been going on for centuries.

We also had a recent U.S. President talk about Alien Life. It was President Regan in his farewell address to the United Nations that mentioned that the “world will someday be forced to come together” to deal with an Alien threat. President Reagan was a huge believer in Alien Life when he was Governor of California.

He ordered his pilot to follow a UFO when he left Merced for Sacramento back to his office while in office and noticed a UFO flying parallel for several minutes to his plane. Alien threats were one of his motivations for building the Strategic Defense Initiative to defend against missile attacks on the U.S. As he told me in his office in California after he left the Presidency, “A President’s first order of business is to defend the people of the United States from all attacks, foreign and domestic”. I asked him by foreign, he meant Alien attacks and he just looked at me and smiled and said, “It means an attack from any one of our enemies.” Remember, we are each just a pebble in the sand on this planet called earth, and just a grain of sand in our own Milky Way, one of the billions of galaxies that exist in a constantly expanding universe. The case for Alien existence on earth may not be 100%, but given the mounting evidence, it is likely it far exceeds a 50% chance in favor of Alien existence on earth and in the universe.

Next month, we will issue our whitepaper on “Quantum Computing and its impact of Hyper-Scaling the next generation of Artificial Intelligence”. I hope you found this paper an interesting read.
